NU Education Internship Program

2. Purpose:

The purpose of this program is to offer students direct hands-on experience in teaching at a

Courses in the Student's Major

Japanese secondary school classroom, under one-on-one guidance from a full-time teacher. Through active and intensive engagement in teaching students, they will gain insight into the responsibilities and expectations of Japanese teachers. Students will also learn to appreciate cultural differences in teaching and classroom management, and have the unique opportunity to engage with Japanese high school students. Consequently, this teaching internship will train students to deal with cultural differences in learning and teaching styles, as well as to learn the role expectations and obligations of Japanese teachers. Participation in the program should also be an advantage in gaining positions for the *JET* program (Japan Exchange and Teaching).

3. Content:

- NU Affiliated High School Placement:

Each intern will be assigned to a mentoring teacher at the Affiliated Secondary School of Nagoya University. The mentor will work closely, on a one-on-one basis with the intern, training her/him on classroom management, teaching methods, student engagement and care, as well as taking part in extracurricular duties.

- Schedule of English classes for first- or second-year high school students:

In principle, students will be assigned to three English classes in their first or second year of high school as a team with other international students. If a student is unable to teach three English classes, he/she will be responsible for at least two classes and will be responsible for planning and organizing extracurricular activities after school and during other times of the day.
