2. List of Courses Open to NUPACE Students

Provided that they have the requisite academic and language background, NUPACE students can opt to register for courses from, 1) the NUPACE programme, 2) G30 International Programmes and, if they possess JLPT N1, 3) Japanese-taught regular courses. NUPACE students are not restricted to the curriculum taught at their school of affiliation but, when selecting courses, should use their common sense and bear in mind that many courses have prerequisites.

In limited cases, graduate courses may be open to undergraduate students. However, please note that the level of difficulty of these courses will be higher, and the grading criteria may be stricter. By contrast, graduate students may freely register for undergraduate courses. However, the decision as to whether credits earned in these courses can actually be transferred lies with the student's home university.

NB. As the majority of NUPACE students will not be able to enter Japan prior to the commencement of the spring semester, only courses that are offered online/in a hybrid form should be registered for. All the courses listed below are taught in an online/hybrid format.

Students who are able to enter the country and complete quarantine by mid-April, may be able to participate in classroom taught classes.

3. Notes on Japanese-taught and other Non-NUPACE/G30 Courses

Students participating in NUPACE may be eligible to register for Japanese-taught and other courses offered to degree-seeking students at Nagoya University. Prior to registration, however, they are requested to consult their academic advisors (p. 29) and confirm with the instructor(s) of the course(s) in question that they meet the academic and language requirements of the class.

4. Students engaging in Research/Guided Independent Study/Clinical

Practice

1. Special Research Students:

Special Research Students are students enrolled in graduate degrees (master's/doctorate level) at their home institutions who, at Nagoya University, wish to engage primarily in supervised research. Research students may register for credits, but are exempt from the obligation to earn credits at

Approximate length of report: 30 pages per semester (18 pages if written in Japanese)

Report submission deadline for spring 2022 semester: Friday, August 5, 2022

When discussing research with their academic advisor, special research students should ask him/her to refer to the following manual for more details: 『しど うきょういん りゅうがくせいたんとうしや指導教員・留学生担当者のための交換留学生受入れマニュアル』, available on the NUPACE website. (<https://nupace.iee.nagoya-u.ac.jp/en/faculty/advisor.html>)

2. Guided Independent Study:

In their second semester of study, NUPACE undergraduate and graduate students can opt to take advantage of the ‘Guided Independent Study (GIS)’ system. After obtaining permission from their academic advisors, students may, with the co-operation of their academic supervisor/ research supervisor, pursue independent research in their major field of study. This research work will be evaluated and credits awarded accordingly. This course aims to integrate knowledge and skills of social psychology as they apply to the field of intercultural communication. By introducing students to intercultural education and training, covering background theories, practical methods, ethics, and evaluation, the course will allow students to get hands on experience in heightening intercultural sensitivity of themselves and others through active group learning, and application of the theories they will learn. As part of human resources development (HRD), intercultural education and training equips personnel with cognitive, affective, and behavioral skills to deal with cross-cultural interaction. We will look at cross-cultural theories that identify difficulty in communication between cultures, and then discuss what content and method would be most effective in training people to deal with such difficulty.

Students will work in teams to design and apply their own training exercises on each other, and discuss how their methods were effective or not. They will gain first-hand experience at practicing intercultural training methods, including role plays, simulations, and group discussions, hence this course is practical in nature, and requires full participation. Finally, students will learn how to evaluate and analyze the effects of training program. The goal of the course is to have students personally experience
